

History of the South Carolina Single Sideband Net

The first session was held on April 7, 1958. The mode was the "new" Single Sideband. The purpose was traffic handling, preparedness and fellowship.

The history of the net has been kept in five large scrapbooks that are on display at several South Carolina Hamfests each year.

The following pages are a small part of this history. You will find the names and calls of some of the net members involved over the fifty years. Also some pictures that show the fellowship and friends made during these years. There are awards and commendations that recognize individual and net contributions.

We believe there will be a 100 year celebration in 2058. Wish we could all check in.
